

BRIG – RIGID INTELLIGENT BOATS @ BOOT DÜSSELDORF

BRIG, the world's leading manufacturer of rigid inflatable boats, prepares to launch their larger new-look show presentation at boot Düsseldorf in 2020 in hall 9 booth A26 to showcase their impressive range of premium sports leisure boats.

- **Display of the all-new BRIG Eagle Series range – 7 class-leading models. 1 unique DNA. This is RIB design for the next era!**
- **innovative design concept for Eagle series: clear edges and a sophisticated touch take international RIB design to the next level**
- **Premiere of the Eagle 6.7 – the best family sports leisure RIB just got even better**
- **Premiere of the Eagle 4 – A path-leading concept for a 4-Meter RIB**

The boot Düsseldorf is the biggest and one of the most important boat shows in the world. With its accessible location in Central Europe it makes it the perfect platform for BRIG to put on its largest display yet to attract both new and existing followers to visit the show from across the continent. (hall 9 booth A26) This increased investment has been justified to coincide with BRIG's rapid growth in the European market and to celebrate recognition as the **leading RIB brand** in Scandinavia, France, United Kingdom, the Netherlands and also Australia & USA.

The latest range of BRIG premium sports leisure boats will be on display at boot Düsseldorf, including the eagerly anticipated premiere of two new models: the **Eagle 6.7 and the Eagle 4**.

BRIG'S DESIGN FOR SUCCESS

The humble **beginnings reach back to 1991** when BRIG was founded in Ukraine by a group of former military aeronautical engineers. They shared the passion for design, innovation and precision engineering and have developed BRIG over the **past 28 years into the global-leading boat-builder** we know today. BRIG currently sets the industry benchmarks **for safety, design, comfort & quality**.

BRIG live by their own motto „**Rigid Intelligent Boats**“. The manufacturer always strives to perfect the interplay of **reliable functionality, strong performance and intelligent design**. BRIG RIBs are therefore based on precise design and accurate manufacturing. This crucial

link between design and production has made it possible to increase manufacturing efficiency through innovative techniques. This allows BRIG, compared to others, to produce a high quality product and to offer it to the customer at a realistic price.

RIB DESIGN REIMAGINED

Since their conception, RIBs have been synonymous with safety and stability. Their rugged, practical appearance has led them to naturally be associated with military and rescue functions rather than with leisure possibilities. BRIG has taken the traditional RIB concept with all the sea-keeping benefits they offer. They re-imagined the design, putting **premium quality finishing, passenger comfort** and the **functionality of a leisure boat** at the heart of everything they do. This design-process through 28 years of evolution and continuous improvement has led BRIG to the stunning new-look Eagle Series range with **7 class-leading models**. They share **one unique DNA**: The RIB design for the next generation!

The BRIG Eagle Series have the sumptuous styling and functionality of luxury sports leisure boats. It also comes with the inherent capability of a high performance RIB thanks to the unique fusion of a **deep 'V' hull** and **wide diameter inflatable tubes**. This unity provides the sea-keeping stability and the ride comfort that you only experience with a BRIG.

Additionally, the BRIG Eagle Series are characterised by their **extended hull length on the waterline** combined with **bluff bow** and shortened stern tube ends. That's why the Eagle not only offers the deck and seating space of a larger boat, but also the handling and performance. These criteria let them simply belie their size making them feel and perform like a much bigger boat on the water.

EAGLE 6.7: THE BEST FAMILY SPORTS LEISURE RIB JUST GOT BETTER

The eagerly anticipated new BRIG Eagle 6.7 is the latest addition to the luxurious Eagle Series. It supersedes the all-time best-selling iconic Eagle 650. During the last years the E650 was the prime example of a family sports leisure boat. With over **1.100 sales** in 6 years it clearly dominated the whole series. The Eagle 6.7 builds on everything that BRIG got right with the Eagle 650 and makes it even better. This luxury family sports leisure boat is simply incredible!

BRIG's new star of the Eagle series is a 6.7-meter RIB with a beam of 2,55 meters and a weight of 750 kilograms without the engine. The construction is characterized by a **reinforced deep ,V' hull**, along with an **extended waterline length, slightly lifted, extra-wide tubes** and a **square bow**. These features allow the Eagle 6.7 to go fast and agile, but also ensuring a stable and dry ride even in heavy seas.

The new-look Eagle Series design DNA is clearly visible in the **sleek angular lines** and **swept back ski pillar**. Stylish polished **stainless rectangular grab rails** combined with classy detailing throughout give the E6.7 contemporary design appeal – a class apart on the water.

“The iconic radar arch that used to identify the previous generation of BRIG Eagle’s has gone to make way for sleeker, classier styling that could pass for a superyacht chase boat costing two or three times as much”

HUGO ANDREAE – EDITOR OF MOTOR BOAT & YACHTING

A PATH-LEADING CONCEPT FOR A 4-METER RIB

The new classy BRIG Eagle 4 raises the bar to another level, setting a new standard for performance, design & functionality for all other compact RIBs to follow. The new-look Eagle Series design DNA is evident in the **elegant angular lines** throughout along with a stylish **swept-back ski pillar** to enjoy watersports in a quiet cove.

The BRIG Eagle 4 measures 4,00 meters in length and 1,95 meters in width with a weight of only 250 kilograms. It is a **high-spec compact performance RIB** offers comfortable seating for up to 5 passengers and ample storage in a large rear locker under the helm seat. The E4 offers a well-structured steering console with enough space for instruments and a display up a size of 8 inch.

BRIG uses only best materials and the Eagle 4 is no exception in this regard. All seats are covered with cushions of **weather- as well as uv-resistant Silvertex farbic** by Spradling. **Stainless steel details** like handles, cleats and closures add that certain something.

The **reinforced deep ‘V’ hull** combined with the E4’s extended **length on the waterline, extra-wide tubes and bluff bow** provide a safe, stable and dry ride even in heavy seas. The driving experience is sure to put a smile on your face. This RIB is a whole lot of fun – whether as a luxurious Yacht tender or a comfortable and stylish leisure boat.
