## **@ BOOT DÜSSELDORF**

### PREMIERE OF THE EAGLE 4

#### A PATH-LEADING CONCEPT FOR A 4-METER RIB

The new classy BRIG Eagle 4 raises the bar to another level, setting a new standard for performance, design & functionality for all other compact RIBs to follow. The new-look Eagle Series design DNA is evident in the **elegant angular lines** throughout along with a stylish **swept-back ski pillar** to enjoy watersports in a quiet cove.

The BRIG Eagle 4 measures 4,00 meters in length and 1,95 meters in width with a weight of only 250 kilograms. It is a **high-spec compact performance RIB** offers comfortable seating for up to 5 passengers and ample storage in a large rear locker under the helm seat. The E4 offers a well-structured steering console with enough space for instruments and a display up a size of 8 inch.

BRIG uses only best materials and the Eagle 4 is no exception in this regard. All seats are covered with cushions of **weather- as well as uv-resistant Silvertex farbic** by Spradling. **Stainless steel details** like handles, cleats and closures add that certain something.

The **reinforced deep ‘V’ hull** combined with the E4’s extended **length on the waterline, extra-wide tubes and bluff bow** provide a safe, stable and dry ride even in heavy seas. The driving experience is sure to put a smile on your face. This RIB is a whole lot of fun – whether as a luxurious Yacht tender or a comfortable and stylish leisure boat.

## SPECIFICATIONS

Length (m)	4,00
Inner Length (m)	2,60
Width (m)	1,95
Inner Width (m)	1,03
Height (m)	1,25
